

## Protect Access to my

### Prescribed Urological and Ostomy Prosthetics and Supplies

- Ostomy and urologic supplies are prosthetics devices that replace an essential bodily function and **not one-size-fits-all generics** and **not interchangeable**
- As a user of ostomy and/or urologic supplies, **I have unique health care needs** – my supplies are prescribed, selected, adjusted, and fitted based on my unique condition
- By including ostomy and urologic supplies in the competitive bidding program, I would be subjected **to the risk of infection**, illness and skin damage **by limiting my & my doctor's choice** of the product best suited for my unique needs
